

DATASHEET

Chicago Metallic 125 mm Bandraster 3125

Sounds Beautiful

Chicago Metallic 125 mm Bandraster 3125

- The 125 mm wide grid system is suitable for the flexible layout of large spaces and positioning of partition walls
- Suitable for the installation of acoustic and fire protection barriers in plenum spaces
- System includes a wide range of spacers and accessories
- Compatible with exposed, semi-concealed and concealed grid ceilings

Cross-section

Compatible tiles

Semi-concealed

Exposed

Coupling

Straight-cut

Assortment

Product group		Component description	Height (mm)	Length (mm)	Colour	Pcs per pack	Lm per pack	Kg per pack
Main runner								
BR125		Bandraster main runner 125 mm	35.4	3600	04, 001	4	14.4	20.4
Cross tee								
BR100 T15 HD CT		Bandraster cross tee T15 Hook	38		001			
BR100 T24 CT		Bandraster cross tee T24 Hook	38		11, 001			
BR100 T24 HD CT			38		11, 001			
Z-section

Understanding the performance of Chicago Metallic grids and accessories

Reaction to fire

Reaction to fire is classified in accordance with EN 13501-1. Chicago Metallic steel grids and accessories are non-combustible.

Fire resistance

A range of Chicago Metallic steel grids are tested in combination with different Rockfon tiles and are classified in accordance with European norm EN 13501-2 and/or national norms.

Colours

Chicago Metallic grids are available in various colours from the RAL and NCS systems, which are measured following the ISO 7724-2 and ISO 7724-3 standards. The actual colours may deviate slightly from the RAL and NCS references. Chicago Metallic grids are available in a variety of finishes from matt to high gloss, with a respective average of < 5, 15 and 50 units at a 60° angle. The matt finishing is measured at an angle of 85°. See the colour legend for their average values. The gloss unit is measured in accordance with EN13523 part 2.

Corrosion resistance

Chicago Metallic products produced from hot dip galvanised steel following the Sendzimir process comply with the corrosion classes of the product standard EN 13964 (A, B, C, D). The standard systems in class B are protected with 100 g/m² zinc evenly applied on both sides. The enhanced corrosion resistance (ECR) systems and accessories in class C or D have respectively a layer of 100 g/m² and 275 g/m² zinc evenly applied on both sides and are protected with an additional layer of 20 micron paint per side.

Load bearing performance

The load bearing performance (max. kg/m² load applicable to the grid system without exceeding the allowable deflection of the individual components) is tested in accordance with the EN 13964 standard. The accumulative value of the system deflection, shown on the data sheets, does not exceed the max. deflection as given in class 1 of the standard. Special project configurations deviating from the standard module sizes mentioned in the data sheets must be calculated by Rockfon technical services.

Cleaning

All Chicago Metallic grids can be cleaned with water and a mild detergent in combination with a melamine foam sponge or microfiber cloth.
