Chicago Metallic Screenline

Sounds Beautiful

Chicago Metallic Screenline

- C-shaped framing for square island shapes with unlimited sizes
- Island framing with or without interior grids
- Perfect colour match with other Chicago Metallic grids
- Availability of system designed accessories
- Profiles deliverable with extra corrosion resistant finishing
- Ergonomic handling and transportation

Cross-section

Compatible tiles

Assortment

Product group		Component description	Height (mm)	Length (mm)	Colour	Pcs per pack	Lm per pack	Kg per pack
Main runner								
SCR C40 CC		Screenline profile 20x43x20 mm for 2 hook connections	43	540		8	4.32	1.5
SCR C40 CC			43	240		8	1.92	0.6
SCR C40 CC			43	2040		8	16.32	5.5
SCR C40 CC			43	3540		8	28.32	9.5
SCR C40 CC			43	2940		8	23.52	7.9
SCR C40 CC			43	1440		8	11.52	3.9
SCR C40 CC			43	2340		8	18.72	6.3
SCR C40 CC			43	1740		8	13.92	4.7
SCR C40 CC			43	1140		8	9.12	3.1
SCR C40 LC				Screenline profile 20x43x20 mm for 1 hook connection	43	2370		8
SCR C40 LC	43	2970				8	23.76	8
SCR C40 LC	43	3570				8	28.56	9.6
SCR C40 LC	43	2070				8	16.56	5.6
SCR C40 LC	43	2670				8	21.36	7.2
SCR C40 LC	43	3270				8	26.16	8.8
SCR C40 LL		Screenline extension profile 20x43x20 mm	43	3600		8	28.8	9.7

Understanding the performance of Chicago Metallic grids and accessories

Reaction to fire

Reaction to fire is classified in accordance with EN 13501-1. Chicago Metallic steel grids and accessories are non-combustible.

Fire resistance

A range of Chicago Metallic steel grids are tested in combination with different Rockfon tiles and are classified in accordance with European norm EN 13501-2 and/or national norms.

Colours

Chicago Metallic grids are available in various colours from the RAL and NCS systems, which are measured following the ISO 7724-2 and ISO 7724-3 standards. The actual colours may deviate slightly from the RAL and NCS references. Chicago Metallic grids are available in a variety of finishes from matt to high gloss, with a respective average of < 5, 15 and 50 units at a 60° angle. The matt finishing is measured at an angle of 85°. See the colour legend for their average values. The gloss unit is measured in accordance with EN13523 part 2.

Corrosion resistance

Chicago Metallic products produced from hot dip galvanised steel following the Sendzimir process comply with the corrosion classes of the product standard EN 13964 (A, B, C, D). The standard systems in class B are protected with 100 g/m² zinc evenly applied on both sides. The enhanced corrosion resistance (ECR) systems and accessories in class C or D have respectively a layer of 100 g/m² and 275 g/m² zinc evenly applied on both sides and are protected with an additional layer of 20 micron paint per side.

Load bearing performance

The load bearing performance (max. kg/m² load applicable to the grid system without exceeding the allowable deflection of the individual components) is tested in accordance with the EN 13964 standard. The accumulative value of the system deflection, shown on the data sheets, does not exceed the max. deflection as given in class 1 of the standard. Special project configurations deviating from the standard module sizes mentioned in the data sheets must be calculated by Rockfon technical services.

Cleaning

All Chicago Metallic grids can be cleaned with water and a mild detergent in combination with a melamine foam sponge or microfiber cloth.

Colour legend

Please note that not all colors are available for every product. We recommend checking the assortment table for the colors currently offered for each item. If you need further assistance or have specific color preferences, please feel free to contact Rockfon.
